User manual

Thank you for choosing @ V2.0.
Please read this manual carefully before use.

Important warnings:

1. This product contains a heating element that can heat up to 500° Celsius. DO NOT expose the heating element to any part of the body or fabric.
2. This product can be used by people aged 8 years and above with supervision and product use instruction.
3. DO NOT use the product while the cap is not sealed.
4. This product contains Lithium Ion batteries. Take proper precautions when handling Lithium Ion batteries.
5. The product is only to be used with the recommended vaporizing medium. The use of other substances may give rise to a toxic or fire risk.
6. The product is intended for household and indoor use only.
7. DO NOT leave the product in extreme heat or damp conditions.
8. DO NOT use the @ when there is flammable gas in the air.
9. This product includes small parts; please keep it out of reach of children and pets.
10. Children should be supervised to ensure that they do not play with the product.
11. This product is NOT waterproof; please keep it dry.
12. DO NOT drop, throw, or misuse this product.
13. NEVER attempt to repair this product yourself.
14. Do NOT use the product while driving.
15. This product is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience or knowledge unless they have been supervised or instructed by a person responsible for their safety.

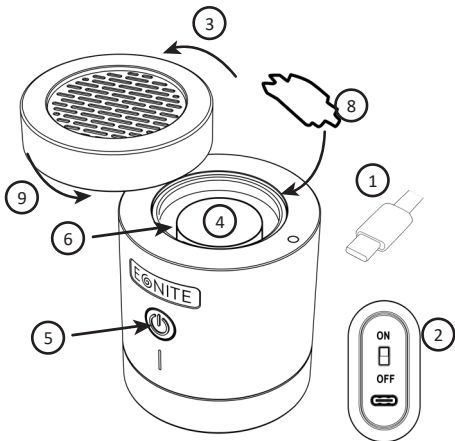

16. The product must only be supplied at a safe, extra low voltage corresponding to the marking on the product.
17. Cleaning and user maintenance shall not be made by children unless they are older than 8 and supervised.
18. The battery must be removed from the appliance before it is scrapped.
19. The appliance must be disconnected from the supply mains when removing the battery.
20. The battery is to be disposed of safely.

Failure to follow these instructions will void the warranty and can result in severe or permanent damage to the battery or product and serious personal injuries or fire breakouts.

These instructions are also available in an alternative format on our website.

Quick start guide:

1. Fully charge the product before the first use until the light indicators are on.
 2. Move the safety switch to ON position
 3. Open the cap
 4. Place the charcoal (self/quick ignited)
 5. Press the On/Off switch twice
 6. Within 30 seconds you will notice the charcoal has been fully ignited
 7. Wait until the ash forms on the charcoal
- *Hint: it can be determined when the flashing light stops
8. Place the bukhoor chips on top of the charcoal
 9. Close the cap
 10. To check the battery level: Press and hold the On/Off switch for 2 seconds

Battery Level Indication:

Green light = 75%- 100% charge
 Yellow light = 50-75% charge
 Red Light = 25%-50% charge

5V USB C charging point

Indication lights:

- Green when battery is full while charging
- White pulsing light during charging
- Red pulsing light when battery is low
- White pulsing after 30 seconds determining the ash forming time

Product introduction:

The @ V2.0 is a high-quality portable charcoal igniter. Self-ignited charcoal is placed inside a metal pot over the heating element that heats up to 500°C, Thus, the device @ is distinguished by its self-ignition and does not require the use of other tools that operate on flames to ignite the charcoal used for incense.

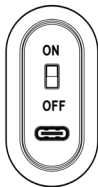

Content of the box:

@ V2.0 – USB C Cable – Tongs – Pouch – Bukhoor storage box

Device parts:

1. Main Body
2. Cap & Mesh
3. Fixed Chamber & Coil
4. Removable chamber
5. Power Button
6. Charge Port (USB C)
7. LED Indicator
8. Magnet Closure
9. Safety Switch
10. Bukhoor storage box
11. Tongs

Use instructions:

Important safety warnings:

1. The content of this product will heat up and may remain hot after use. DO NOT touch the cap, metal pot and any items near the heating element with your fingers.
2. This product can be used by people aged 16 years and above.
3. DO NOT use the product while the cap is not closed.
4. When using the @ V2.0, make sure the product at a safe distance of at least 20 cm from any body parts including hair and clothing items.
5. Keep the @ V2.0 away from any flammable fabrics or materials, including but not limited to clothing, scarves, curtains, etc.
6. Never cover the @ V2.0 with any external object until the device completely cools down, with a minimum of 60 minutes after last use, as it might still retain heat or lit charcoal.

Failure to follow these instructions will void the warranty and can result in severe or permanent damage to battery, product or in worst case, can cause serious personal injury, or lead to fire.

Operating the device:

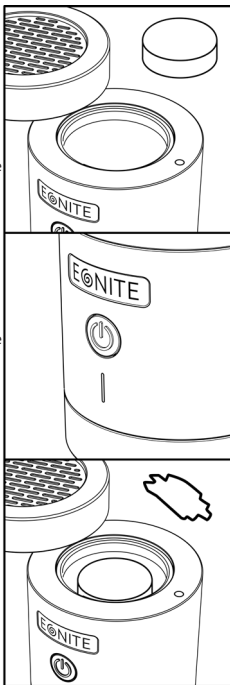

1. Move the safety switch to ON position
2. Open the cap
3. Place the charcoal (self/quick ignited)
4. Press the On/Off switch twice
5. Within 30 seconds you will notice the charcoal has been fully ignited
6. Wait until the ash forms on the charcoal

*Hint: it can be determined when the flashing light stops

7. Place the bukhoor chips on top of the charcoal
8. Wait until the charcoal became ready and the ash forms, then place the bukhoor on top of the charcoal.

Indication Light:

1. Low Battery – Pulsing Red
2. Charging – Pulsing White
3. Full Charge – Steady Green
4. Working – Steady White
5. Burn Time (ash forming) – Pulsing White

Maintenance:

- Before cleaning the product, ALWAYS make sure the heating element is OFF and the product is cooled down.
- The product or any part of it cannot be cleaned in the dishwasher. Doing so will cause damage to the product.
- DO NOT use water or cleaning detergents inside the metal pot. Doing so might damage the product.
- DO NOT use your fingers when cleaning the product or its parts.

Storage:

General safety instructions:

- Store the product at room temperature (Between 40 and 80°F / 5 to 25°C) for best results.
- Store the product in a cool, dry place. NEVER store the product in any location that is directly exposed to high temperatures such as near an open flame, heater, an outdoor vehicle, garage, or in the sun.
- Keep the product out of reach of children and pets.

Charging:

General safety instructions:

- ONLY charge the product at safety extra low voltage (SELV). The supply voltage is 5 V DC
- Fully charging a completely empty battery takes 5 hours.
- ALWAYS inspect the product to ensure there are no signs of damage, deformity, or swelling before charging. If there are, discontinue charging the battery, and follow the proper procedures to dispose of the product.

- ALWAYS charge the product in a fireproof environment and away from combustible material. Do not charge on surfaces that can catch fire easily.
- NEVER charge batteries unattended. Always remain in constant observation distance of the charging process & react to potential problems that may occur.
- NEVER charge a deformed, swollen or ballooned product. Continuing to charge a battery that has begun to swell will result in a fire.

Follow these steps if you see any deformity on the product due to battery swelling:

- a. STOP the charging process by unplugging the charger and disconnecting it from the product immediately.
- b. Remove the product from the indoor charging area.
- c. Place it in an open non-flammable area.
- d. Watch it for approx. 30 minutes from a safe distance.
- e. Follow the proper procedure to dispose of the product.

- Charge your Lithium Ion battery with a good quality, dedicated Lithium Ion battery charger. A poor-quality charger may not be able to charge or protect your battery properly and can be dangerous.

- Charge at room temperature of: 32 to 113°F / 0 to 45°C. Discharge in an environment temperature of: 32 to 140°F / 0 to 60°C. Let the battery cool down to ambient temperature before charging. During discharge and handling of batteries, the battery must not exceed 160°F/ 70°C.

Lithium Ion battery life:

Rechargeable Lithium Ion batteries do not last indefinitely.

When the battery has lost 20% of its initial capacity, the battery needs to be disposed of properly.

Proper disposal of Lithium Ion batteries:

Regulations and laws pertaining to the recycling and disposal of Lithium Ion batteries vary from country to country as well as by state and local governments. You should check the laws and regulations where you live. the laws and regulations where you live.

Warranty:

@ is not responsible for any damage caused by human error. Legal warranty is applied.

Product warranty is limited to original defects in material

According to Waste of Electrical and Electronic Equipment (WEEE) directive, WEEE should be separately collected and treated. If at any time in future you need to dispose of this product please do NOT dispose of this product with household waste. Please send this product to WEEE collecting points where available.

and workmanship. The warranty does not cover collateral damage. Due to the nature and use of this product, there is no warranty period. Misuse, abuse, incorrect charging, failure to comply with the above warnings and guidelines, and other inappropriate use of this product are not covered by the warranty.

Limitation of liability:

To the extent not prohibited by applicable law, in no event shall @ be liable for personal injury, or any incidental, special, indirect or consequential damages whatsoever, including, without limitation, damages for loss of profits, business interruption or any other commercial damages or losses, arising out of or related to your use or inability to use the product, however, caused, regardless of the theory of liability (contract, tort or otherwise) and even if @ has been advised of the possibility of such damages. Some jurisdictions do not allow the limitation of liability for personal injury, or of incidental or consequential damages, so this limitation may not apply to you.
